Apple Pay is easy to operate. The entire transaction is secure, because your credit and debit card numbers aren't stored on your device or any server, so they're never shared with merchants. To add your Alpine Credit Union debit or credit card, you'll need an Apple Pay-supported device with iOS 8.1 or newer operating system. Please keep in mind that the default image can be different from your personalized credit or debit card when your card is added to your passbook/wallet.

3 Easy Steps to Get Started

1. Look for the Pay Wave® or Apple Pay symbols at checkout and hold your mobile device near the contactless reader.

2. Place your finger on the Touch ID™. In some cases, you may need to enter a passcode and sign a receipt.

3. Keep your mobile device by the reader until it vibrates and beeps, indicating your payment was accepted. Learn more about Apple Pay here.
